

## **Camp Aquasco Letterboxing**

Please enjoy the letterboxing. A couple of requests - please put the box back as you found it (slightly hidden) so the next scout can have fun finding it as well. Please bring your own inepad (we couldn't fit one in the boxes). And Have Fun!

1. Go to the place to "view the stars". The ladybug started down the red trail about 75 scout steps. Do you see the knothole that she climbed in?
2. The fly flew past the triplet tree to the twin tree on the right. She went off the path 8 scout steps to the right.
3. Down the "yellow" brick road the spider found the perfect home. She went behind the decaying log on the left.
4. The caterpillar liked that spot too, so up the path from the spider's home, she found her spot inside a smaller log on the right.
5. Find your way to the scaly lizard tree and at its base you will find the ant's home.
6. When the troll moved out from under the bridge, the dragonfly moved in.
7. Now that you have visited all of the insects, come back to the tree seat next to cabin three to leave your mark for others to find.
