NEW! AI Patch Program for Cadettes!

Thanks to a partnership with the Booz Allen Foundation we are excited to announce a new council patch program! Cadette Girl Scouts can complete the AI 101 module to get the base patch. Each additional module has a rocker patch. Leaders can join an upcoming webinar to learn more. The webinars will be recorded and added to gsLearn.

Learning Modules

Module	Description
AI 101	Introduces what AI is, how it works, and the role data plays in AI. Participants learn key AI vocabulary and explore how AI is used in everyday life.
Generative AI & Prompting	Introduces generative AI and prompting through a creative patch-design activity. Participants learn how to work with AI tools, write effective prompts, and use AI to bring their ideas to life.
AI & Human Relationships	Explores how AI can affect relationships, communication, wellness, and human connection. Participants work with AI tools, share their reactions to new technologies, and discuss how they want to use AI in their lives.
AI Deepfakes & Security	Introduces AI ethics and security. Participants explore ethical questions about AI, learn about deepfakes and synthetic media, practice spotting manipulated content, and play a card game focused on responsible AI use and ethical decision-making.

Leader Info Webinars

November 18: 6:30 p.m.	November 20: Noon
