

Endangered Species Patch Program

Green Sea Turtle

“One way to open your eyes to unnoticed beauty is to ask yourself, ‘What if I had never seen this before? What if I know I would never see it again?’”

Rachel Carson, 1907-1964

Do you want to protect wildlife, our environment, and make the world a better place? In 1973, Congress passed the Endangered Species Act (ESA) to recognize the environmental importance of protecting species from extinction. As you explore the importance of the ESA, you will discover how to protect an endangered species and the habitat it depends on to survive. You can lead the way by understanding why this law is so important to our planet.

Daisies, Brownies, and Juniors: complete steps 1–3

Cadettes, Seniors, and Ambassadors: complete steps 1-5

1. Learn about endangered and threatened species and the ESA process
2. Investigate two endangered species locally, regionally, or globally
3. Make a creative project inspired by endangered species
4. Visit a local environmental organization in your area
5. Present what you learned about endangered species

Purpose:

When I have earned this patch, I will have an understanding of endangered species, their habitat, and the process of protecting them through the Endangered Species Act.

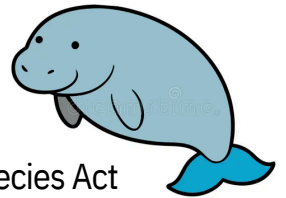

Let's make the world a better place.

The Girl Scout Council of the Nation's Capital and National Oceanic and Atmospheric Administration (NOAA) partnered to develop the Endangered Species Patch Program.

Girl Scouts can take an active role to better understand the biodiversity of our environment. You can make a difference and make the world a better place! Environmental stewardship has been a key part of the Girl Scout experience for over a century.

By completing this program, Girl Scouts will:

- Girls Scouts will discover the history and importance of the Endangered Species Act of 1973 and what they can do to help endangered species.
- Girl Scouts will connect with local organizations concerning local and global species that need to be protected.
- Girl Scouts will take action by getting involved locally through various projects which will focus on environmental stewardship.

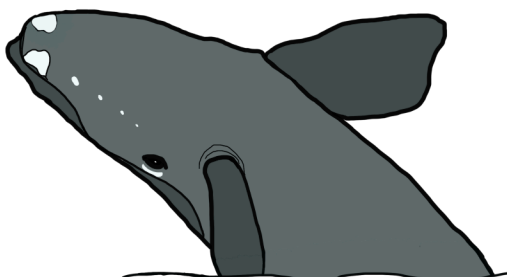

Antillean Manatee

The activities in this booklet are designed for Girl Scout Cadettes, Seniors, and Ambassadors, but can be completed by any level. The patch program is divided into five different steps. See each step for activity requirements. Once you have completed the patch program, you will earn the Endangered Species patch, which can be purchased online at the Girl Scout Shop.

<https://www.girlscoutshop.com/GSCNC-Endangered-Species-Patch>

Environmental stewardship has been a key part of the Girl Scout experience for over a century.

Northern Atlantic Right Whale

More to Explore

As you explore and research, collect pictures of endangered species including mammals, fish, reptiles, birds, coral, plants and trees. Create a collage, vision board, or map of these interesting species to get inspired while you earn the Endangered Species patch.

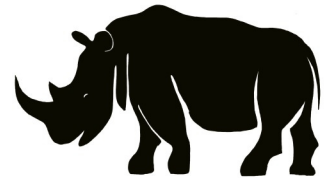

Environmental Toolkit

Understanding the terms associated with protecting endangered species is important. Below is a list of some common terms you should know. Use a dictionary or the internet to familiarize yourself with all these terms. Keep track by defining them in a notebook. Expand your vocabulary!

Environment	Ecosystems	Biological Opinion	Monitoring	Native	Socioeconomics
Endangered	Delist	Marine Debris	Regulation	Invasive	Missions Statement
Threatened	Extinct	Recovery Plans	Candidate	Population	Emergency listing
Conservation	Habitat	Federal Register	Petitioned	Sustainability	Science-based management
Critical Habitat	Take	Stock Assessment	Restoration	Marine Debris	Incidental takes
Flora & Fauna	Bycatch	Federal Agencies	Climate	Pollutions	Exotic pet trade

Make sure you stay safe online and sign the Girl Scouts Internet Safety Pledge!

Alternative Facts

We are all influenced by different media outlets, and it can be difficult to sort out facts, falsehoods, and different points of view. Who is credible? Do we believe everything we read? Is a statement accurate or exaggerated? Make sure you are getting your information from trustworthy sources, and always check out multiple sources when you are learning about a new subject.

Search the Endangered Species Act. What information is in the news? Are the articles all the same or subjective to a point of view? Develop your own set of criteria for evaluating the quality, balance and fairness of the information presented. Make sure your information and presentations reflect your standard for quality, balance and fairness. Live by the Girl Scout law.

STEP 1 Discover

Learn about endangered & threatened species with the Endangered Species Act (ESA).

All ages: Complete the required activity

Cadettes, Seniors, and Ambassadors: Complete **two additional** activities

- **Required:** Research the process of how an endangered species is listed on the ESA. How is a species listed? What is the difference between **endangered** and **threatened**? Does the ESA protect both animals and plants? Which government agencies are responsible for the ESA? How do local, state, & federal agencies participate?
- Research two delisted endangered species and the process to delist them. How did we know they had recovered? How is a species removed from the list?
- Research two changes to the ESA and/or search the Federal Register for additions and amendments. How does the public know what changes are being proposed? Can they make comments?
- Research two other conservation laws and methods. How are they similar/different to the ESA?
- Research international laws that affect the protection and trade of wildlife parts and products. What species are protected under CITES (the Convention on International Trade in Endangered Species of Wild Fauna and Flora)?

environment*

STEP 2

INVESTIGATE

Investigate vanishing wildlife. Are there some near you locally, in your region, or globally? Investigate two species from the list below or research two endangered species that interest you.

All ages: Complete the required activity

Cadettes, Seniors, and Ambassadors: Complete **one additional** activity

- **Required:** Pick two species from the list below. Are they threatened or endangered? Describe their appearance, habitat, and diet. Share what you know with a friend.
- Using the two species you chose from the required activity, identify where they live and the areas their population is growing or shrinking. Are there other protective regulations, concerning your species? What are they? What can be done to help them recover and reduce those threats?
- Using the two species you chose from the required activity, identify two common factors/threats that caused the species to become threatened or endangered. What threats are in their environment? What can be done to help them recover and reduce those threats?

Local Species:

Baltimore Checkerspot Butterfly
Cheat Mountain Salamander
Shenandoah Salamander
Atlantic Sturgeon
Bog Turtle
Indiana Bat
Virginia Big-eared Bat
Dwarf Wedge Mussel
Swamp Pink
Northeastern Bulrush
Hay's Spring Amphipod
Tiger Beetle

Regional Species:

Atlantic Coast Piping Plover
North Atlantic Right Whale
Green Sea Turtle
Red Knot
Florida Manatee
Red Wolf
Kemp's Ridley Sea Turtle
Shortnose Sturgeon
Mississippi Sandhill Cranes
Johnson's Seagrass
American Chestnut
Small Whorled Pogonia

Global Species:

Giant Panda
Northern White Rhinoceros
Northern Rockhopper Penguin
Vaquita
Oceanic White Tip Shark
Polar Bear
Blue Whale
Orangutan
Cantharellus Coral
Floreana Coral
Coastal Redwoods
Rafflesia Flower

The Wildlife badge was released almost 40 years ago. To earn the badge, girls had to define the terms threatened, endangered, and extinct wildlife; choose one endangered species native to the US and find out why it has become endangered, and what is being done to help it survive.

STEP 3 CREATE

Advocate with art by making a creative project inspired by endangered species.

All ages: choose one project

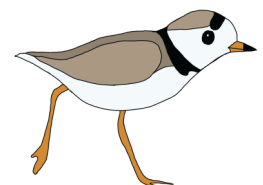

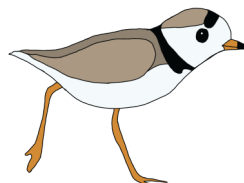

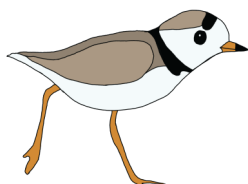

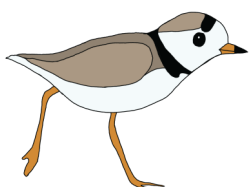

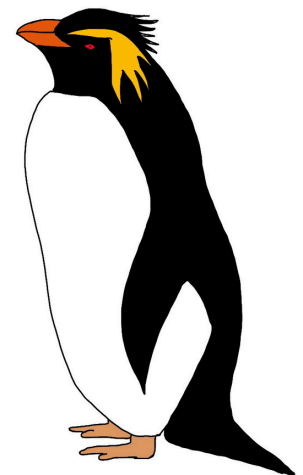

- Enter a piece of original artwork into the Saving Endangered Species Art Contest (annual event), or a local endangered species or wildlife art/photography contest.
- **Daisies, Brownies, Juniors, and Cadettes only**-Enter a piece of original artwork into the NOAA Marine Debris Calendar (annual event), or a local endangered species or wildlife art/photography contest.
- Create a PSA (public service announcement) about a endangered species, environment law, or conservation organization that helps protect and recover species. Promote your PSA on social media.
- Write and illustrate your own storybook about an endangered species. Share your storybook to a group of younger Girl Scouts.
- Develop an endangered species board game and include as many species as possible. Share and play your game with other Girl Scouts and classmates! Share why it is important to protect the ESA!
- Create an Infographic. Think of five things you could do to enhance the public's understanding of endangered species in your own community. Explore what you learned about endangered species in this program. Create to inspire!

Advocate with your creativity!

Tell other Girl Scouts about this patch!

GO BIG! Contact your local Service Unit and ask if you can show your PSA, presentation, or creative artwork at the next meeting, camp, other events!

Get online and connect with <http://www.endangered.org/> about how you can promote your message about the importance of protecting endangered species.

STEP 4

EXPERIENCE

Cadettes, Seniors, and Ambassadors: Choose one of the options below or develop your own Endangered Species experience.

- Research and identify an organization or facility in your community or explore a location that interests you. See the examples listed to the right. Find their mission statement, which is a formal summary of goals and values of a company or organization. Is the organization charged with the responsibility to manage habitat, wildlife preservation or support endangered species and their habitat? If so, this would be a great place to visit! Learn more about the organization and plan to visit.
- Explore, hike, and tour the natural area and learn about wildlife habitat, how the area is being managed for wildlife, and if there is any habitat present for endangered species.
- Meet a staff biologist, site manager, or research scientist and learn how they improve or plan to improve habitat for endangered species or other wildlife species. Learn about how to protect our environment and make the world a better place.

Examples of facilities to visit:

- Local Nature Centers
- County or State Parks
- National Wildlife Visitor Centers
- State or National Wildlife Refuge
- Wildlife Sanctuary and Visitor's Center
- Nature/Wildlife Preserve
- Non-profit Environmental Organization
- Natural History Museum or Science Center
- Aquarium or Zoo

State or Federal wildlife/environmental agencies:

- Bureau of Land Management
- Department of Conservation and Recreation
- Department of Natural Resources
- National Oceanic and Atmospheric Administration
- National Park Service
- United States Fish and Wildlife Service
- United States Forest Service
- United States Geological Survey

Other ways to experience the wilderness: If you cannot get to a local park or wilderness area, attend a webinar, a lecture, or watch a documentary concerning our environment. Discuss how these other media sources can also be important in helping protect endangered species. Present what you learned to your troop.

STEP 5 Present

Environmental Stewardship

Make headlines! Get involved! TAKE ACTION!

Cadettes, Seniors, and Ambassadors: complete one activity

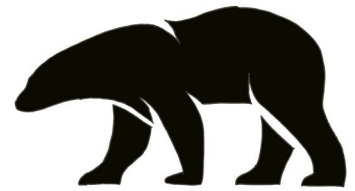

- Organize or staff an exhibit/or table top display at an Endangered Species Day event. Present what you have learned and why protecting endangered species is important to you. Endangered Species Day website: www.endangeredspeciesday.org.
- Call, write, or visit your state or federal Senator/Representative or congressional office and explain “Why I care” about this important topic, and present how you would like them to help protect and enhance the Endangered Species Act.
- Be a citizen scientist. Look for projects in your area through local organizations or log on to participate and see how you can be a citizen scientist.
- Volunteer at any of the facilities listed in Step 4, or at a local wildlife rehab, nature center, museum, zoo, or aquarium.
- Join a conservation group or society. Participate in their meetings and then consider starting your own group at your school!

TAKE ACTION! Be a part of an Endangered Species Day. This annual event is on the third Friday in May. Be part of the solution and engage the public on the importance of protecting endangered and threatened species and what we can all do to help them. Register your event at www.endangeredspeciesday.org!

“The work of today
is the history of
tomorrow
and we are its makers.”
-Juliette Gordon Low

Conservation Info

A few Conservation Acts and Agreements

AtlanticTunas Convention Act(ATCA), 1975
Convention on International Trade in Endangered Species (CITES), 1973
Endangered Species Act (ESA), 1973
Magnuson-Stevens Fishery Conservation and Management Act of 1976
Marine Mammal Protection Act (MMPA), 1972
Marine Protection, Research, and Sanctuaries Act of 1972
Migratory Bird Treaty Act (MBTA), 1918
Organic Act of 1916
Shark Conservation Act (SCA), 2010
Wild Bird Conservation Act (WBCA) 1992

Conservation organizations

Below are a few organizations. Do your own search for endangered species organizations and see what information you find.

Defenders of Wildlife
Endangered Species Coalition
Environmental Defense Fund
International Union for the Conservation of Nature
Oceana
The Sierra Club
The National Audubon Society
The Nature Conservancy
Wildlife Conservation Society

What's next?

Check out these badges to develop skills that will help you advocate for endangered species.

Cadettes- Finding Common Ground badge. Why is it important to protect a species? Learn strategies for bringing people together and debating your opinion.

Seniors- Truth Seeker badge. Did you come across different facts or falsehoods in your research? Learn more about evaluating media literacy to find the truth.

Ambassadors- Public Policy badge. Do you want your voice to be heard? Learn about public policy and how to advocate for change. Engage as a global citizen and protect endangered species.
